

NAPCOR Position on Existing Supply Initiatives

Given that there is chronically more demand than supply for recycled PET...

Given that PET's recyclability; its ability to successfully incorporate recycled content; and its well-established recycling and reclamation infrastructure are integral to PET's unique sustainability premise...

Given that it is incumbent on NAPCOR to protect existing volumes of recycled PET, both to successfully promote the PET package as the sustainable resin of choice, and to support NAPCOR member interests...

NAPCOR is opposed to the repeal of existing PET supply generating initiatives, including deposit legislation, *unless* they are replaced by initiatives that are equally effective, immediate, and sustainable.

NAPCOR will review new and developing PET supply generating initiatives and legislation on a case-by-case basis.
