NAPCOR WELCOMES HUSKY INJECTION MOLDING SYSTEMS AND SIDEL INC

PET Trade Organization Continues to Expand its Member Roster

Sonoma, California, September 9, 2009 – The National Association for PET Container Resources (NAPCOR) announced today the addition of two new members: Husky Injection Molding Systems of Bolton, Ontario, Canada, and Sidel Inc. of Norcross, Georgia. Both companies join NAPCOR’s “supplier-to-the-industry” member category: Husky as a manufacturer of injection molding equipment and services; and Sidel as a manufacturer and supplier of beverage packaging lines.

NAPCOR Chairman, Tom Busard, welcomed the new members and said, “This steady increase in membership really speaks to the immediacy and importance of the issues of interest to the PET industry, including sustainability and recycling. So many companies are looking at what these issues mean to them – or might mean in the future.”

The new additions bring NAPCOR’s member total to thirty-five and additional new member announcements are anticipated in the coming weeks. NAPCOR membership is comprised of manufacturers of PET resin; PET bottles and jars; PET sheet and thermoformed packaging; and suppliers to the PET industry.

NAPCOR plans release of its annual “Report on Post Consumer PET Container Recycling Activity” for 2008 in late October. The report will be available via the NAPCOR web site, www.napcor.com, immediately following its release. A new NAPCOR web site design will also launch early this Fall.

NAPCOR is the trade association for the PET plastic industry in the United States and Canada and is committed to being the credible voice and champion of the PET industry; to facilitate solutions to PET recycling; and to articulate and communicate the attributes of the PET container as a sustainable package.
